# Best Practices for Writing Prompts With ChatGPT

# Types of Prompts

- One-Shot Prompts
- Two-Shot Prompts
- Dual-Prompts
- Prompt Priming
- Tree of Thought Prompts
- Setting Multiple Instructions

# One-Shot Prompt

“Write a social media post designed for first-time homebuyers that is engaging, informative, and visually appealing. The content should focus on demystifying the home buying process, emphasizing the joy and pride of owning a home. It should highlight tips for securing a mortgage, understanding credit scores, and finding the right property. The tone should be optimistic and empowering, encouraging young families and professionals to take the step towards homeownership. Please include a call-to-action that invites them to a free webinar on home buying essentials, with a link to sign up. The visual should be warm and welcoming, resonating with the aspirations of new buyers.”

# Two-Shot Prompt

## **First Shot:**

"Create a social media post targeting first-time homebuyers. The goal is to educate and inspire confidence in the home buying process. The post should highlight key steps like mortgage pre-approval, searching for the right home, and the final purchase. The tone should be encouraging and supportive, with a clear, concise message. Can you draft a sample post with this focus?"

*After receiving the first draft, you provide feedback for refinement:*

## **Second Shot:**

"Thank you for the draft. Now, I'd like to refine the message to appeal more directly to young families and professionals. Please emphasize the financial benefits of homeownership, such as building equity and potential tax advantages. Also, include a call-to-action for a webinar that details these benefits and guides them through the financing options available. Adjust the visual to something that conveys growth and stability, such as an image of a young family enjoying their new home."

# Dual Prompts

**Prompt 1:** "Create a visual graphic for first-time homebuyers that educates them on the importance of credit scores in the home buying process. The graphic should explain how credit scores affect mortgage rates and loan approval in a clear and simple way. Include a visual element that illustrates this relationship, such as a graph or an infographic."

**Prompt 2:** "Once you have created the visual graphic, write a social media post to use on Facebook along with the graphic."

# Tree of Thought Prompt

## **Initial Seed (Root of the Tree):**

"Develop a social media campaign for first-time homebuyers."

## **First Branch (Expanding on the Root):**

"In the first post, focus on demystifying the mortgage pre-approval process. Provide clear, step-by-step guidance on what documents are needed, how credit scores impact the process, and why pre-approval is a crucial first step in home buying."

## **Second Branch (Another Expansion):**

"For the second post, create content that illustrates the journey from renting to owning. Highlight the emotional pride and financial benefits of homeownership, such as equity growth and potential tax deductions."

## **Third Branch (Delving Deeper):**

"In the third post, address common fears and misconceptions about the home buying process that may deter first-time buyers. Provide reassuring facts and motivational messages to encourage them to take the first step."

## **Connecting the Branches (Synthesizing the Tree):**

"Ensure that each post includes a consistent design theme and tone that aligns with our brand's message of trust and guidance. Include a call-to-action that invites readers to a webinar for more detailed information and personal assistance."

## **The Fruit (Final Outcome):**

"The end goal is to create a cohesive series of posts that not only inform and educate but also inspire confidence in first-time homebuyers, leading to increased engagement and sign-ups for the webinar."

# ATM Method

**A (Act):** Just as you'd select the type of transaction at an ATM, here you define the 'role' you want ChatGPT to assume. Whether it's a Loan Officer, Marketing Manager or Manager, you're selecting the expert hat you want the model to wear.

**T (Tell):** This is like specifying the transaction details, such as the amount to withdraw. Here, you're directing ChatGPT on the specific task or information you seek, shaping the depth and scope of the response.

**M (Message):** Think of this as choosing the note denominations at an ATM. This determines the format or style in which you receive the information—be it in bullet points, a formal report, or even a Southern tone.

# Let's Prompt

1. Act like a Real Estate Agent. Create tips and advice about the advantages of working with a real estate expert.
2. Act like a Real Estate Agent. Create a complete email newsletter including a featured article, the latest blog posts, resources, social media, and call-to-action that targets first-time home buyers to achieve their goal of homeownership.
3. Act like a Real Estate Agent. Craft a persuasive sales pitch to showcase your unique selling points and commitment to exceptional service.

# Setting Multiple Instructions
